## 2016 Construction Program

Thank you for your interest in the Pennsylvania Department of Transportation District 1 2016 Construction Program. This publication is intended to provide a general overview of projects that currently are under construction and those scheduled to be awarded or begin construction in 2016.

The 2016 Construction Program is divided into six sections, one representing each county of the District. Award dates, expected completion dates, project descriptions, project locations, cost, and maintenance of traffic are listed. The list estimated cost for a project is for the construction phase only. County maps have also been included for reference.

Please keep this book on hand throughout the upcoming construction season.

***Note: All information is correct as of the distribution date of this booklet. However, all estimated costs and dates are subject to change.***

## **PennDOT Public-Private Partnerships (P3)**

### *What is a P3 Project?*

A P3 project is a contractual agreement between a public entity and private entity that:

- 1) Transfers the responsibility of a facility's engineering, construction, operation and/or maintenance to the private sector for a defined period of time;
- 2) Allows the private sector to perform by contract a service previously provided by the public sector; and
- 3) Ensures the private firm receives payments either from existing revenue sources or through the collection of new tolls or user fees.

The two basic P3 project types are:

- 1) New Build Facilities – Adding capacity to the system by building something new.
- 2) Existing Facilities – Improving capacity or performance of the current system through a P3 arrangement.
