

U.S. Routes 11/15 Rock Slope Safety Improvement Project Marysville Section

Eastbound U.S. 22/322 Closure

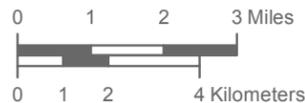

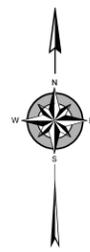

Portions of Eastbound U.S. 22/322 from U.S. 11/15 to PA 325 and PA 225 to the North Front Street exit do not have a colored incident detour route and would result in a detour of Eastbound U.S. 22/322 to U.S. 11/15. In the event of an incident closing the U.S. 22/322 eastbound lanes in these areas, traffic will be immediately diverted onto the incident detour route (shown as light blue). If the incident is expected to last more than 3 hours, one lane through the project work area will be cleared and Southbound U.S. 11/15 will be opened for use (shown as dark blue).

Closure of Both Eastbound and Westbound U.S. 22/322

In the event of an incident requiring the total closure of U.S. 22/322 eastbound and westbound in the areas shown above, both directions of traffic would be immediately diverted onto their respective incident detour routes (shown as light blue and light purple). If the incident is expected to last more than 3 hours, one lane through the project work area will be cleared for the next rush hour direction (AM = Opening one Southbound U.S. 11/15 lane (shown as dark blue); PM = Opening one Northbound U.S. 11/15 lane (shown as dark purple)) while the non-rush hour traffic direction will continue to use the incident detour route for the duration of the incident. If an incident is expected to last for more than 8 hours, the project work area will be cleared and 2 lanes of U.S. 11/15 will be opened.

Westbound U.S. 22/322 Closure

Portions of Westbound U.S. 22/322 from U.S. 11/15 to PA 325 and PA 225 to PA 443 do not have colored incident detour routes and would result in a detour of Westbound U.S. 22/322 to U.S. 11/15. In the event of an incident closing the U.S. 22/322 westbound lanes in these areas, traffic will be immediately diverted onto the incident detour route (shown as light purple). If the incident is expected to last more than 3 hours, one lane through the project work area will be cleared and Northbound U.S. 11/15 will be opened for use (shown as dark purple).

- Project Work Area (to be reopened only during an incident on U.S. 22/322 lasting more than three hours)
- Area of Road Closure During an Incident
- Westbound U.S. 22/322 Incident Detour Route (for use after three hours)
- Eastbound U.S. 22/322 Incident Detour Route (for use after three hours)
- Westbound U.S. 22/322 Incident Detour Route (for Immediate Use)
- Eastbound U.S. 22/322 Incident Detour Route (for Immediate Use)
- Variable Message Sign (VMS) - Will alert traffic of incidents and provide detour guidance.
