

# PENNSYLVANIA Airports Economic Impact

## The Pennsylvania Airport System

Pennsylvania's aviation industry continues to provide high quality jobs and spur important local spending by on-airport businesses and agencies. The commonwealth's system of 15 commercial service and 117 general aviation airports connects Pennsylvania businesses and residents to the national and global economy. This system is comprised of a network of airports, airlines, air cargo businesses, corporate flight departments, pri-

vate aircraft owners, and recreational airplane pilots. Manufacturers in the state rely on airports to access markets and to receive supplies. Businesses rely on airports to conduct face-to-face meetings with customers and business associates within the United States and abroad. Leisure travelers use airports to reach recreational and tourist sites and to visit with family and friends.

## Pennsylvania's Total Annual Economic Impacts from Aviation

When all of the impacts of Pennsylvania's system airports are added together, nearly 304,500 total jobs can be traced to the aviation industry. These employees receive more than \$9.2 billion in total payroll, and generate nearly \$23.6 billion in total economic activity. In addition, Pennsylvania's airports provide a number of health, welfare, and safety benefits, the impacts of which are immeasurable. Such services include aerial agricultural spraying, medical transport and evacuation, flight training, law enforcement, wildlife management, military exercises, and search and rescue operations.

### Impact Measures

*Employment* measures the number of full-time equivalent (FTE) jobs related to airport activity, including on-airport

construction. A part-time employee is counted as half a full-time employee.

*Payroll* measures the total annual wages and benefits paid to all workers whose salaries are directly attributable to airport activity.

*Economic Activity (Output)* measures the value of goods and services related to airports in Pennsylvania. The output of on-airport businesses is typically assumed to be the sum of annual gross sales and average annual capital expenditures.

**Total Jobs – 304,464**

**Total Payroll – \$9.2 billion**

**Total Output – \$23.6 billion**

## Study Process

This study, sponsored by the Pennsylvania Department of Transportation, Bureau of Aviation, analyzes the economic impact of Pennsylvania's aviation industry as a whole, as well as the impacts of its individual airports. The study confirms that many people—beyond the immediate environs of each airport—derive significant economic benefits from the daily operation of the airport system. The study also evaluates some of the less-quantifiable impacts linked with aviation, such as health, safety, recreation, education, and overall community strength.

A detailed modeling effort was undertaken to quantify the economic impacts of on-airport activities (airlines, fixed base operators, flight schools, corporate flight departments, government, and various other business). Also quantified were the impacts derived from the expenditures of visitors who arrive via scheduled service and general aviation aircraft. These on-airport impacts and visitor expenditures support additional economic activity throughout Pennsylvania.

As initial waves of activities associated with the airport system are released into Pennsylvania's economy, successive waves of employment, payroll, and economic benefit occur. These additional benefits are measured using sector-specific employment, payroll, and economic impact multipliers.

## Impact Types

*Direct Impacts* include both direct impacts related to on-airport businesses and government agencies, and off-airport impacts, which are usually attributable to visitor spending.

*Multiplier Impacts* are comprised of indirect and induced impacts. These impacts are attributed to employees spending their earnings at local businesses, and the on-airport businesses purchasing goods and services locally. This re-circulation is commonly referred to as the “multiplier effect.”

*Total Impacts* are the combination of all direct, indirect, and induced impacts.

## Qualitative Benefits

Keller Brothers Airport is located six miles south-east of the City of Lebanon in Lebanon County, between Harrisburg and Allentown. The airport is accessible via State Route 419.

Keller Brothers Airport is classified as a Limited airport by the Pennsylvania Bureau of Aviation. The airport has 28 based aircraft and experiences approximately 4,990 annual aircraft operations. The airport has one turf runway, Runway 07/25, that is 2,692 feet long by 120 feet wide.

Keller Brothers Airport is a privately-owned, public-use airport that supports the general aviation needs of the local community. The airport has one on-site business tenant, Eagle II Aeronautics, which serves as the airport’s fixed base operator. Eagle II Aeronautics offers airplane and helicopter flight instruction, aircraft rental, aerial tours and sightseeing, and aerial photography.

The most common activities at Keller Brothers Airport are recreational flights, including significant ultra-light activity, touch-and-go operations, and flight training. Other common activities include corporate flights, military exercises, and operations by local law enforcement. The airport also experiences agricultural spraying, albeit only seasonally. Since 2009, JAARS Missions organization has hosted its “Missions at the Airport” event annually at Keller Brothers Airport. The event is designed to showcase aircraft used in missions around the world and highlight the technology JAARS uses to support worldwide Bible translation. The event includes the opportunity for attendees to ride in a missionary airplane or helicopter and observe a Helio Courier flight demonstration.
