Please complete survey at end of presentation
SR 3005, Section B06 (Chapel Road) Slope Stability Project.

- The purpose of this presentation is to introduce the project to the public and gather feedback
- The purpose of the project is to reestablish Chapel Road in Center Township, Beaver County
  - Landslide repairs on left lane shoulder headed northbound
  - Roadway, utility and guide rail work
PROJECT LOCATION
Landslide repair includes reconstruction of the lane and shoulder on the embankment side of the road with milling and resurfacing of the lane and shoulder on the cut slope side. The reconstruction length is approximately 200 feet.

Geosynthetic Reinforced Slope Repair (GRS)

Scope also includes drainage improvements

Right-of-way required (about)

- 0.089 acres of permanent ROW.
- 0.164 acres of Temporary Construction Easement
RIGHT-OF-WAY

- Required Right-of-Way
- Temporary Construction Easement
When traveling northbound on Chapel Road
- Left onto Center Grange Road
- Right onto Brodhead Road
- Right onto Old Brodhead Road
- Continue until intersection with Chapel Road

Traffic in opposite direction will follow the same detour.
Detour Length: approximately 5.8 miles (11 minutes)
The transportation decision making process includes feedback from the public. In addition, public outreach is part of the NEPA (National Environmental Policy Act) process:

- NEPA requires agencies to integrate environmental values into their decision-making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions
- NEPA also includes public involvement activities and gathering feedback from the public
