Travel Delays Through Potters Mills Start Next Week

Drivers will encounter flagging in the work zone

State College, PA – The Pennsylvania Department of Transportation (PennDOT) is issuing a mid-June update for its Route 322/Potters Mills Gap project in southeast Centre County. **As utility work takes place over the next two weeks, drivers can expect major delays as flaggers enforce an alternating traffic pattern.** Up-to-date information can be found on the PMG Project page at www.penndot.gov/pottersmillsgap.

Drivers can expect the following June 17 through 21:

- **Roadway flagging is planned beginning June 17 and running through June 28 each weekday between the hours of 9:00 A.M. and 5:00 P.M. The flagging will enforce an alternating traffic pattern along Route 322 between Route 144 and Decker Valley Road. The flagging is necessary for utility relocation work. Delays could be lengthy due to traffic volumes and drivers should consider alternate routes.**
- **Drivers should visit 511PA before heading out to determine length of delays and potential alternate routes.**
- **Message boards across the region will feature delay information—including travel times and delay times.**
- **Long-haul, commercial truck drivers are strongly encouraged to use Routes 11/15 and I-80 as an alternate route.**
- A mile east of Potters Mills, the crossover from Decker Valley Road to Sand Mountain Road remains in place, with one lane open in each direction. This crossover will continue through September.
- Within the crossover, there is a **14-foot width restriction for westbound traffic and a 15-foot width restriction for eastbound traffic.** These width restrictions will also be in place through September.
- Work will also continue off the roadway and drivers should **be alert for construction vehicles entering and exiting Route 322** through the Potters Mills area.

This is the third and final phase of a construction project dating back to 2015. Phase One of the project constructed the new bridge at Sand Mountain Road. Phase Two created the new local interchange on Route 322 at Sand Mountain Road. The goal of Phase Three is to reconstruct Route 322 from Sand Mountain Road to Potters Mills – including a new Route 322/Route 144 intersection. The completed project will alleviate congestion and allow traffic to move more safely and efficiently from the Centre/Mifflin County line to Potters Mills.

Glenn O. Hawbaker, Inc. of State College is the contractor on this \$82 million project.

Motorists are encouraged to “Know Before They Go” by checking conditions on more than 40,000 roadway miles by visiting www.511PA.com. 511PA, which is free and available 24 hours a day, provides traffic delay warnings, weather forecasts, traffic speed information and access to more than 950 traffic cameras.

511PA is also available through a smartphone application for iPhone and Android devices, by calling 5-1-1, or by following regional Twitter alerts accessible on the 511PA website.
