## **PennDOT Clearfield County Maintenance Work Schedule for the Week of April 15**

**Clearfield, PA** – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Clearfield County the week of April 15. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Clearfield County for the coming week is as follows:

### **Manual Patching**

- Route 2007 in Decatur Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2039 in Cooper Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.

Most permanent pothole patching is completed in the spring/summer when temperatures stay consistently above freezing. If maintenance crews were not repairing potholes, the road surface would break up further and require more expensive corrective measures.

### **Pipe Replacing & Cleaning**

- Route 153 between Bennett's Valley Highway and the Elk County line in Huston Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 219 between Cherry Tree borough and Route 3004 (Sylvia Road) in Burnside Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2001 (Plank Road) between the Cambria County line and Route 729 (Veterans Street) in Gulich Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2041 (Carrs Hill Road) in Pike Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 3002 (Stiffler Town Road) in Burnside Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 3004 (Stiffler Hill Road) in Burnside Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.

Pipe replacement and cleaning are essential in maintaining water flow around state roadways. Controlling water flow is one of the most important aspects of maintaining pavements. Uncontrolled

water flow will damage both the pavement surface and the area under the pavement, which causes deterioration across the length of the pipe.

### **Shoulder Maintenance**

- Interstate 80 westbound between mile markers 111 and 123. Monday, April 15, through Friday, April 19. PennDOT will implement short-term lane closures while completing this work.

Shoulder cutting removes excess material and debris from unpaved shoulder areas. Shoulder grading involves the shaping and stabilizing of those same areas. Both operations improve drainage, allow water to leave the roadway, and eliminate shoulder drop-offs. These are crucial highway maintenance operations because when drainage systems do not function properly, water collects on the road, weakens pavement, accelerates the formation of potholes, and creates the potential for icing conditions in the winter months.

### **Signing**

- Various routes throughout the county. Monday, April 15, through Friday, April 19. This work takes place off the roadway and has minimal, if any, traffic impact.

Signs are the most prominent way PennDOT communicates roadway safety and other information to our customers. County maintenance organizations have crews responsible for installing and repairing signage along state roads and reviewing installed signs to determine if replacements are needed. Reasons for replacing a sign include age, vandalism, or damage.

### **Vegetation Management**

- Route 53 between Houtzdale and Osceola Mills boroughs in Decatur Township. Monday, April 15, through Friday, April 19. Flaggers in the roadway will provide traffic control.

Mowing, herbicide spraying, and selected tree thinning help maintain a safe roadway free of obstructing vegetation, improving visibility to spot signage, traffic control devices, and other motorists, bicyclists, pedestrians, and animals approaching the road. Additionally, a well-maintained roadside can improve drainage and prolong the life of the roadway.

PennDOT urges motorists to exercise caution in these and all work zones to ensure their safety and the safety of county maintenance staff.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
