PennDOT Clinton County Maintenance Work Schedule for the Week of April 15

Clearfield, PA – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Clinton County the week of April 15. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Clinton County for the coming week is as follows:

Base Repair:

- Route 664 (Coudersport Park) in Woodward Township. Monday, April 14, and Tuesday, April 16. Flaggers in the roadway will provide traffic control during daylight hours.

Base repair is intended to repair fatigue cracked, potholed or distorted pavement sections and restore the structural integrity of the pavement. All distressed material within the area, including the material beneath the asphalt, is removed and replaced with sound material. The new material is then compacted before being overlaid with new asphalt. Base repair extends the service life of good and fair roads and provides a smooth, safe ride for motorists.

Bridge Maintenance & Cleaning

- Route 144 (Ridge Road, Tamarack Road) in Noyes Township and Leidy Township. Monday April 15, though Wednesday, April 17. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 120 (Huron Avenue) in Renovo, from Gratzmare Avenue to just past Stoudts Hill Avenue. Thursday, April 18, and Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.

Pennsylvania has some of the oldest bridges in the country, with an age of more than 50 years on average. Preventive maintenance is vital in extending the life of the structures. As such, PennDOT maintenance crews perform some bridge deck patching and structural repairs.

Pipe Replacing & Cleaning

- Route 144 (One Forty Fourth Street) in Leidy Township. Monday, April 15. Flaggers in the roadway will provide traffic control during daylight hours.

Pipe replacement and cleaning are essential in maintaining water flow around state roadways. Controlling water flow is one of the most important aspects of maintaining pavements. Uncontrolled water flow will damage both the pavement surface and the area under the pavement, which causes deterioration across the length of the pipe.

Shoulder Maintenance

- Route 664 in Woodward Township. Wednesday, April 17, through Friday April 19. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 1003 (Little Plum Run Road) in Gallagher and Dunnstable townships. Tuesday, April 16, though Friday, April 19. Flaggers in the roadway will provide traffic control during daylight hours.

Shoulder cutting removes excess material and debris from unpaved shoulder areas. Shoulder grading involves the shaping and stabilizing of those same areas. Both operations improve drainage, allow water to leave the roadway, and eliminate shoulder drop-offs. These are crucial highway maintenance operations because when drainage systems do not function properly, water collects on the road, weakens pavement, accelerates the formation of potholes, and creates the potential for icing conditions in the winter months.

PennDOT urges motorists to exercise caution in these and all work zones to ensure their safety and the safety of county maintenance staff.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
