

## Public Meeting Survey

Please take a few minutes to fill out the survey so we may better understand your concerns.

PennDOT plans to rehabilitate the existing SR 3012 Market Street Bridge connecting the east and west shores and City Island. The bridge rehabilitation includes historic arch construction and rehabilitation with deck replacement on the 16-span eastern section of the bridge and construction of new deck and beams on the 16-span western section of the bridge with improvements to the sidewalks on both sections of the bridge.

1. The preferred alternative maintains four travel lanes while replacing and improving the sidewalk surface on the East Bridge. The west bridge will replace and improve the sidewalks with wider sidewalks and also includes 2' shoulders. Do you have other specific comments or concerns with the preferred alternative that should be considered by the project team? Please list them.
2. In order for the contractor to have room to safely complete the proposed work, traffic control must be in place long term. Several options exist to maintain traffic:
  - full detour of vehicular traffic on the western bridge which may allow shorter construction durations
  - detouring westbound traffic while maintaining one lane eastbound between the west and east shores.
  - Maintaining one lane in both the eastbound and westbound directions during construction which could complicate the construction and lengthen construction durations.

### Would you be in favor of (check one)

more access (no full detours or maintaining one lane in each direction) during construction which will potentially lengthen construction durations (i.e. years of construction)

less access (using full detour or westbound detour) during construction which can potentially shorten construction durations

3. Do you have other specific comments or concerns with the possible traffic control options presented that should be considered by the project team? Please list them.

4. Do you have questions about the project? Please Check one      Yes      No

If so, please list your questions and the project team will get back to you. (You will need to provide your name, address, and phone # on the back of the form).

5. Are the plans informative?

<b>1</b>	<b>2</b>	<b>3</b>
Not informative	Somewhat informative	Very informative

What could be done to improve the presentation?

6. Do you have other specific comments or concerns? Please list them and the project team will get back to you. (You will need to provide your name, address, and phone # on the form below).

.....

Please provide the following information in the event we wish to contact you for more information.

NAME:

ADDRESS:
