

# PENNSYLVANIA Airports Economic Impact

## The Pennsylvania Airport System

Pennsylvania's aviation industry continues to provide high quality jobs and spur important local spending by on-airport businesses and agencies. The commonwealth's system of 15 commercial service and 117 general aviation airports connects Pennsylvania businesses and residents to the national and global economy. This system is comprised of a network of airports, airlines, air cargo businesses, corporate flight departments, pri-

vate aircraft owners, and recreational airplane pilots. Manufacturers in the state rely on airports to access markets and to receive supplies. Businesses rely on airports to conduct face-to-face meetings with customers and business associates within the United States and abroad. Leisure travelers use airports to reach recreational and tourist sites and to visit with family and friends.

## Pennsylvania's Total Annual Economic Impacts from Aviation

When all of the impacts of Pennsylvania's system airports are added together, nearly 304,500 total jobs can be traced to the aviation industry. These employees receive more than \$9.2 billion in total payroll, and generate nearly \$23.6 billion in total economic activity. In addition, Pennsylvania's airports provide a number of health, welfare, and safety benefits, the impacts of which are immeasurable. Such services include aerial agricultural spraying, medical transport and evacuation, flight training, law enforcement, wildlife management, military exercises, and search and rescue operations.

### Impact Measures

*Employment* measures the number of full-time equivalent (FTE) jobs related to airport activity, including on-airport

construction. A part-time employee is counted as half a full-time employee.

*Payroll* measures the total annual wages and benefits paid to all workers whose salaries are directly attributable to airport activity.

*Economic Activity (Output)* measures the value of goods and services related to airports in Pennsylvania. The output of on-airport businesses is typically assumed to be the sum of annual gross sales and average annual capital expenditures.

**Total Jobs – 304,464**

**Total Payroll – \$9.2 billion**

**Total Output – \$23.6 billion**

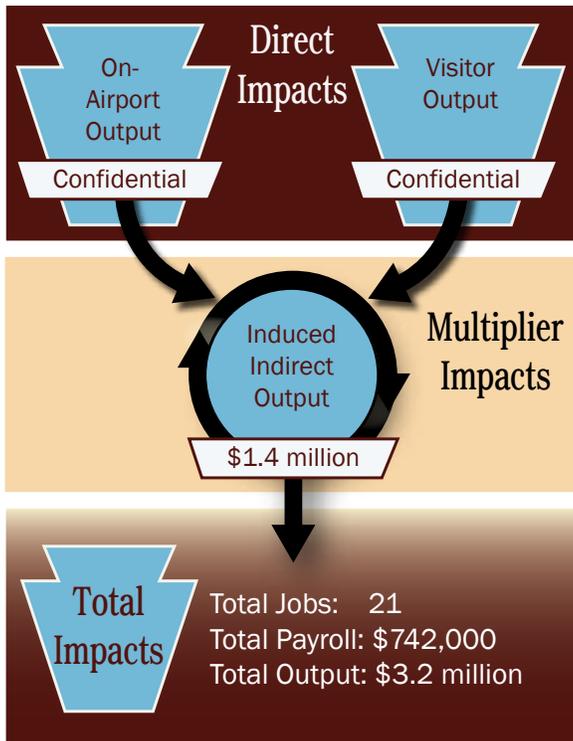

## Study Process

This study, sponsored by the Pennsylvania Department of Transportation, Bureau of Aviation, analyzes the economic impact of Pennsylvania's aviation industry as a whole, as well as the impacts of its individual airports. The study confirms that many people—beyond the immediate environs of each airport—derive significant economic benefits from the daily operation of the airport system. The study also evaluates some of the less-quantifiable impacts linked with aviation, such as health, safety, recreation, education, and overall community strength.

A detailed modeling effort was undertaken to quantify the economic impacts of on-airport activities (airlines, fixed base operators, flight schools, corporate flight departments, government, and various other business). Also quantified were the impacts derived from the expenditures of visitors who arrive via scheduled service and general aviation aircraft. These on-airport impacts and visitor expenditures support additional economic activity throughout Pennsylvania.

As initial waves of activities associated with the airport system are released into Pennsylvania's economy, successive waves of employment, payroll, and economic benefit occur. These additional benefits are measured using sector-specific employment, payroll, and economic impact multipliers.

## Impact Types

*Direct Impacts* include both direct impacts related to on-airport businesses and government agencies, and off-airport impacts, which are usually attributable to visitor spending.

*Multiplier Impacts* are comprised of indirect and induced impacts. These impacts are attributed to employees spending their earnings at local businesses, and the on-airport businesses purchasing goods and services locally. This re-circulation is commonly referred to as the “multiplier effect.”

*Total Impacts* are the combination of all direct, indirect, and induced impacts.

## Qualitative Benefits

Pennridge Airport is located in Perkasio in Bucks County, approximately 10 miles north of Philadelphia. The airport is accessible via State Route 309 and State Route 563.

Pennridge Airport is classified as a Basic airport by the Pennsylvania Bureau of Aviation. The airport is home to 47 aircraft and experiences approximately 30,000 annual operations. The lone runway, Runway 08/26, measures 4,215 feet long by 100 feet wide and is outfitted with medium intensity runway lighting (MIRL). The airport is equipped with three non-precision approaches (RNAV RWY 08, RNAV RWY 26, and NDB-A).

Pennridge Airport is a privately-owned, public use facility that serves the general aviation needs of the local community. Services are provided by the airport sponsor and include fuel, aircraft storage, and extensive aircraft maintenance. The airport also has modern general aviation terminal facilities.

The airport meets a variety of general aviation needs for the local community and region. Although not officially designated as a reliever airport, it does help alleviate general aviation congestion at some of the larger airports in the Philadelphia region. The services and general aviation terminal make it an attractive option for companies in need of corporate aviation. According to the FAA, the following firms and companies utilized Pennridge Airport during 2010:

- Bank of America
- Clemmer Moving and Storage
- Turco Nursery
- Bell AA Flying Club

The facility is used extensively for recreational flights. The airport also supports flight training activity and emergency medical operations.
