

# Hot Pour Mastics

## *Extending the Life of Roadway Repairs*

Hot Pour Mastics provides a stable, flexible repair that bonds firmly with existing pavements. It can be used as a one-time application any time of the year for large cracks and small potholes in concrete and asphalt pavements.

## *What are the benefits?*

- **Flexible, versatile** and **permanent**
- **Extends the cycle length** of routine crack sealing
- **Extends the life** of concrete and asphalt pavements
- Stays **flexible** at lower temperatures

## *How does it work?*

By combining the flexibility and adhesion of rubberized asphalt sealants and the strength capabilities of engineered aggregates, Hot Pour Mastics completely fills the repair void. The result provides an even repair that bonds firmly with existing pavements to seal out water, return structural strength, improve ride quality and prevent further damage for years to come.

## *How do I learn more?*
