

## APRAS Release Notes

- Release #:** M08  
**Release Date:** Sunday, January 29, 2023  
**Comments:** This release is comprised of system configuration tables, enhancements and bug fixes.

### Permit Application Enhancements

- Applicants will receive an alert when required to provide proof of permission to use a Guide Rail.

- Removed the option to receive permits via Fax. APRAS will email all permits, supplements, and denials.
- Added the following reminder about uploading Documents:  
*Please verify all attached documents have the correct Application ID to reduce delays (Final Super Load Documents need to display Preliminary Super Load Application IDs).*

### Home Screen Changes

- State Holidays will appear at the top of the screen five business days before instead of one.
- Added the Account Number to the Select Account box at the top of the screen for applicants with multiple accounts.

### User Management Updates

- New Business Partner users that register as an APRAS Administrator will also receive the billing role automatically. Existing user can assign the billing role to themselves or other users by accessing User Management in APRAS.

## PennDOT use only

- Moved the following configuration tables from Legacy to Mod: Permit Types, Bridge Analysis Codes, Document Types, Guide Rails. These items will be maintained in Mod and view-only in Legacy.
- Added history screen to Account Maintenance.
- Added history screen to these configuration tables: County, Holiday.
- Added prompt to save when navigating away from Account Maintenance.
