

Pennsylvania Department of Transportation Section 106 Annual Report - 2020

Prepared by:

Cultural Resources Unit, Environmental Policy and Development Section,
Bureau of Project Delivery, Highway Delivery Division,
Pennsylvania Department of Transportation
Date: March 31, 2021

For the:

Federal Highway Administration, Pennsylvania Division
Pennsylvania State Historic Preservation Officer
Advisory Council on Historic Preservation

Main Street Bridge over SEPTA, Sellersville Borough, Bucks County, Pennsylvania

Appendix A: Exempted Projects List	
Appendix B: 106 Project Findings List	

I. Introduction

The Pennsylvania Department of Transportation (PennDOT) has been delegated certain responsibilities for ensuring compliance with Section 106 of the National Historic Preservation Act (Section 106) on federally funded highway projects. This delegation authority comes from a signed Programmatic Agreement [signed in 2010 and amended in 2017] between the Federal Highway Administration (FHWA), the Advisory Council on Historic Preservation (ACHP), the Pennsylvania State Historic Preservation Office (SHPO), and PennDOT. Stipulation X.D of the amended Programmatic Agreement (PA) requires PennDOT to prepare an annual report on activities carried out under the PA and provide it to the FHWA, SHPO and ACHP within 60 days of the new calendar year—FHWA and SHPO granted PennDOT 30-day extension to this timeline due to the COVID-19 pandemic. The following document, therefore, is PennDOT’s good-faith effort to comply with this Stipulation.

This document, therefore, pertains only to projects funded by FHWA or state-funded projects within PennDOT’s Highway Administration. It does not include information related to other state-funded projects (i.e., those projects solely intending to comply with the Pennsylvania State History Code), from other PennDOT Departments (e.g., Multimodal Transportation or Driver and Vehicles Services) nor does it include information for other transportation projects awarded to other Commonwealth agencies (e.g., DCNR receives transportation funding from FHWA, through PennDOT, for trail projects). This report also does not include projects requiring permits from any other federal agency (e.g., United States Army Corps of Engineers [USACE], National Park Service [NPS], or United States Forest Service [USFS]) where those agencies function as the lead federal agency for a Section 106 undertaking.

The period covered in this annual review is between January 1 and December 31, 2020 and provides summary statistics on: projects exempted from Section 106 review; effect findings (i.e., no effects, no adverse effects, and adverse effects); information on SHPO objections to effects determinations; an update on PennDOT Cultural Resource Professionals (CRPs) and District Designees (DDs) staffing and training to maintain their delegation to review projects under the PA; and finally, a few notable success stories.

II. Summary of Projects Reviewed under the PA

The heart of this document comes from Section X.D of the Amended PA, which states: “PennDOT will prepare an annual report on the activities carried out under this Amended PA. The report will include a list of projects and findings made by PennDOT. The report may also identify issues and make recommendations for improving the

implementation of this Amended PA. PennDOT will submit the report to the signatories of this Amended PA, within 60 days of the start of the calendar year. The report will serve as the basis for an annual review of this Amended PA.”

This section provides a statistical summary of projects reviewed by PennDOT District Designees (DDs)—District Designees are PennDOT environmental staff in the Engineering Districts who have completed Section 106 training—and Cultural Resource Professionals (CRPs), describes SHPO disagreements with determinations of eligibility and effect made by PennDOT, and summarizes comments made by federally recognized Tribes/Nations and consulting parties on projects. The data in the tables below are derived from PennDOT’s online cultural resources public consultation website called “Pennsylvania Heritage and Transportation (PATH)” which can be found at <https://path.penndot.gov/>.

III. Exemptions

Appendix C of the Amended PA contains a list of project activities that may be exempted from further Section 106 review provided that the activities meet certain conditions. The activities on the list, with the conditions imposed, should have no potential to effect historic properties. Appendix C of the Amended PA is divided into two sections, Level 1 activities and Level 2 activities. Level 1 activities may be exempted by either DDs or CRPs, while Level 2 activities can only be exempted by CRPs.

Between January 1, 2020 and December 31, 2020, PennDOT exempted 260 federally funded projects from further review; DDs exempting 99 projects and CRPs exempting 161. The table below summarizes the number of exemptions made by each District and by the DDs and CRPs. A more detailed spreadsheet including a list of projects that were exempted (by District and MPMS#), the exemption type per Appendix C of the Amended PA, the person making the exemption, and the date the exemption was made, can be found in **Appendix A** of this report.

IV. Review of Non-Exempt Projects by CRPs

In addition to the 260 exempted projects, PennDOT also made 189 effect determinations. This includes: 155 findings of “no effect” (82%), 23 findings of “no adverse effect” (13%), and 8 findings of “adverse effects” (5%). These numbers are similar to the past several years of project undertakings and effect findings. The below table categorizes the effect findings by PennDOT Engineering Districts. A full listing of project findings can be found in **Appendix B**.

EXEMPTED PROJECTS

District	Designee	CRP	TOTAL

TOTAL	155	24	10	189

V. Disagreements/Objections and Concerns Expressed by the SHPO on Eligibility and Effects

A large component of PennDOT's project delivery program and consultation under Section 106 relies on the inherent trust placed on it, and built over many years, by the SHPO and FHWA to submit projects without review and/or concurrence. As spelled out in the delegation programmatic agreement, PennDOT is only required to consult with the SHPO on findings of "no adverse effect," under certain conditions as outlined in the

Amended PA, and all “adverse effect” findings. PennDOT’s CRPs may also consult with SHPO and seek concurrence outside of these scenarios at their discretion. Typically, this may include concurrence on level of identification, mitigation, and other consultation as part of the Section 106 undertaking. In total, PennDOT CRPs requested concurrence from SHPO 110 times (28 for eligibility and 82 for effects determinations) during 2019. Of those requests, seven resulted in a disagreement or objection from SHPO. All of these objections were resolved through further consultation or are on-going as of the drafting of this report. The below table enumerates the total number of eligibility and effects concurrence requests by Engineering District:

SHPO Concurrence Requests

District	Eligibility	Effects	TOTAL
1	0	8	8
2	0	4	4
3	0	7	7
4	3	6	9
5	3	4	7
6	12	20	32
8	5	19	24
9	3	9	12
10	0	0	0
11	1	4	5
12	1	1	2
TOTAL	28	82	110

SHPO Objections on Identification, Eligibility and Effects:

- District 6-0, Chester Co., SR 0322-SIP, MPMS# 110949, ER# 2020-8170-029: While SHPO concurred on the eligibility determination for the Horseshoe Pike above ground resources, they also noted “in the future, when multiple resource survey forms are submitted that appear to be historically and/or physically related (the basic definition of a historic district), please provide more information assessing this potential, whether it be in the individual survey forms themselves or as a separate memo (if there is sufficient information to justify not preparing an overall Historic Resource Survey Form for the grouping).”
- District 6-0, Chester Co., SR 0041-926, MPMS# 102709, ER# 2018-8040-029: SHPO disagreed with PennDOT’s determination that the proposed project would result in a “No Adverse Effect” finding on the NR-eligible Blue

Bell Tavern (Key# 106518). While PennDOT disagreed with this, the CRP accepted the opinion of SHPO in order to advance the project.

- District 6-0, Chester Co., SR 0082-SIP, MPMS# 110963, ER# 2019-8123-029: PennDOT determined the property at 703-704 Reeceville Road (Key# 066133) as ineligible for listing in the NR. SHPO disagreed with this determination, stating that “the farm meets the registration requirements for the ‘Fluid Milk Dairying, Poultry, Truck Farming, Nurseries, and Specialty Products, 1870-1940’ and ‘Suburbanization and Specialization, 1940-1960’ periods of the Southeastern Pennsylvania region of the Historic Agricultural Resources of Pennsylvania c. 1700-1960 context”. Through subsequent consultation, PennDOT provided SHPO with additional documentation to support their determination. However, SHPO continued to disagree with the agency. The PennDOT CRP accepted SHPO’s opinion to advance the project, which resulted in a “No Adverse Effect” finding for the 703-704 Reeceville Road property.
- District 8-0, Cumberland Co., 7212-BRG, MPMS# 102271, ER# 2020-8013-041: PennDOT determined that the Anderson-Hempt Farm (Key# 211593) and Bricker-Hempt Farm (Key# 211592) as individually eligible for listing in the NR. SHPO disagreed and noted that these two resources are contributing to a larger Hempt Farm (Key# 211622). The PennDOT CRP did not disagree with SHPO’s opinion as the project would result in a “No Adverse Effect” finding on the resource, regardless.
- District 8-0, Lancaster Co., SR 0462-03B, MPMS# 79020, ER# 2018-8240-071: SHPO disagreed with the CRPs determination that the following resources were eligible for listing in the NR as contributing resources: 123 Chestnut Street (Key No. 075934), 125 Chestnut Street (Key No. 075935), 127 Chestnut Street (Key No. 075936), 129 Chestnut Street (Key No. 075937), and 205-207 Hellam Street, stating that “while the following resources were considered contributing at the time of listing in 1983, it is our opinion that due to extensive alterations, they no longer retain sufficient integrity to contribute to the district and in our opinion, should be considered non-contributing”.
- District 8-0, Franklin Co., SR 3011-008, MPMS# 1100163, ER# 2019-8168-055: PennDOT determined the Reitzel Store (Key# 050680) as not eligible for listing in the NR. However, SHPO disagreed, stating that “It is our opinion that the Reitzel Store...remains eligible for listing in the National Register of Historic Places under Criterion C in the area of Architecture”. The District CRP agreed with SHPO and the project resulted in a “No Effect” finding after the APE had been redrawn to avoid the resource.
- District 9-0, Blair Co., SR 0453-14B, MPMS# 98732, ER# 2019-8171-013; While SHPO agreed on an eligibility determination, they disagreed on the “scope and level of effort utilized to identify historic properties for this project,”

considering that resources within the APE were slated for acquisition and demolition. The identification level of effort to resolve SHPO's objection is still on-going.

- District 12-0, Fayette Co., SR 4038-D10, MPMS# 81992, ER# 2017-8276-051: SHPO disagreed with PennDOT's Alternatives Analysis Report for the Layton Bridge Project, stating the report "does not adequately document that the One-Way Couple Alternative should not be advanced. As per the alternatives report, the One-Way Couple Alternative would result in No Adverse Effect to the Layton Bridge, and under Section 106, the agency is to first consider options that would potentially avoid adverse effects." Through subsequent responses and consulting party meetings, PennDOT addressed SHPO's comments, concluding with SHPO's concurrence on Sept 28, 2020 that all alternatives have been evaluated and removal and replacement of the bridge is the only viable alternative.

VI. Public and Tribal Consultation

PennDOT and PA SHPO had on-going meetings throughout 2020 to prepare for the roll-out of SHPO's new file management system called "PA-SHARE." The intent, from PennDOT's perspective, was to reduce duplication of efforts from both agencies. The integration between PATH and PA-SHARE seamlessly shares files without SHPO having to go into PATH and reducing the need of CRPs to go into PA-SHARE. The integration was fully implemented in early 2021 as a result of these efforts in 2020.

While outreach to the public presented unusual challenges for the Cultural Resource Specialists in 2020, the team adjusted. Kevin Mock worked with PennDOT's Digital Communication Office on continued improvements to the [cultural resources website](#). Monica Harrower presented the Ross Fording Road Bridge over Octoraro Creek Historic Truss Bridge Rehabilitation Project virtually at ASHE SW Penn Chapter meeting. CRPs were guest contributors to the PA SHPO's blog ([Preserving York County's Hull Drive Bridge](#), [Section 106 Success @ Reading's Penn Street Bridge](#), and [We Will Bounce Back in Emmaus](#)). Kara Russell contributed an article, "Legacy Bridges in the Keystone State", to *Pittsburgh ENGINEER*, a publication of the Engineers' Society of Western Pennsylvania. [The issue](#) was produced in conjunction with the International Bridge Conference that was to be held in Pittsburgh (though was held virtually in 2020 due to COVID-19 restrictions) and focused on the theme of bridges of heritage and legacy.

For a unit that regularly engages the public through the Section 106 consulting party process, the COVID-19 pandemic required reevaluation of how to generate dialog between the public and project teams. For some CRPs with few local consulting parties,

conducting meetings via a group phone call was not much of a shift. Others who regularly conduct face-to-face consultation found new ways to bring people together to discuss project effects to historic properties. Virtual platforms such as Microsoft Teams and Skype for Business allowed shared video and audio for participants. District 6-0 created a guide for people new to virtual platforms that was adopted by other districts. Eight of the eleven districts required group consulting party coordination during 2020. The CRPs' flexibility and adaptability allowed projects to progress during the challenging year.

VII. Training and Delegation under the PA

A. PennDOT Staff Updates

PennDOT hired Keith Heinrich in September 2020 to fill the architectural historian CRP position for District's 9-0 and 12-0. Prior to joining PennDOT, Keith worked for the PA SHPO for over 12 years in their National Register review section. After working for SHPO, he entered the private sector as a consultant for a few years. By the end of 2020, Keith was partially delegated for certain CRP tasks with an anticipation of being fully delegated in early 2021. In addition, to Keith, PennDOT also hired Hannah Harvey at the end of 2020 for the District 6-0 Archaeology position. Hannah comes to PennDOT from the PA SHPO office, where she worked in their GIS section. Hannah was also a former PennDOT intern for the PHAST (Pennsylvania Highway Archaeological Survey Team) program. She will be working towards CRP delegation in 2021.

With Keith and Hannah added to PennDOT's Cultural Resources Unit, we now have 12 District CRPs, a full complement, one Unit chief (Kara Russell), and two supervisors (Kris Thompson, for architectural historians, and Kevin Mock, for archaeology). We anticipate relying less on consultants through 2021, depending on staffing needs.

B. Consultant Support

PennDOT relies on consultant cultural resource professionals to in-fill and supplement existing District CRP complements where needed. All consultant CRPs meet the same rigorous standards as permanent staff, including meeting Secretary of the Interior standards and qualifications, as well as PennDOT's delegation process and Section 106 training. In 2020, PennDOT delegated Paula Miller, who is an archaeologist for Rettew in Lancaster, PA. With the addition of Paula, PennDOT has a pool of 16 consultant CRPs (nine architectural historians and seven archaeologists).

C. Training

Annual training for CRPs (required by the Amended PA) was held on Thursday, October 8th 2020—virtually in 2020 due to COVID-19 related restrictions. In addition, a joint meeting was held with the SHPO staff and staff from the FHWA, immediately following, to augment the training and discuss issues of mutual interest in support of the Amended PA.

Refresher training on the Cultural Resources Handbook was held for District Designees on Thursday, November 12, 2020.

VIII. Success Stories

A. Historic Bridge Rehabilitations

PennDOT completed several historic bridge rehabilitations during 2020, ranging from a standard stone arch rehabilitation to relocation of an eligible metal truss bridge. In the northwest corner of the Commonwealth, the Department rehabilitated a 1913 concrete arch in Lawrence Park Township, Erie County. This Main Street Bridge over Four Mile Creek is individually eligible for the National Register and contributes to the Lawrence Park Historic District, a planned community for General Electric Locomotive Division Employees. The arch was able to be saved and the parapet walls were replaced with a design similar to the original recessed panels. (photo 1)

Photo 1: Main Street Bridge over Four Mile Creek, rehabilitated arch with new parapets similar to the historic design.

Across the state, PennDOT was completing the Lenape Road Bridge over Brandywine Floodplain project in Birmingham Township, Chester County. This National Register-listed 1911-1912 masonry structure was stripped down to the barrel arch and received a concrete moment slab and concrete core parapet walls. The crew faced the parapets and spandrel walls above the arch with the removed stone, replaced the capstones, and rehabilitated the original pipe railing. (photo 2)

Photo 2: Lenape Road Bridge over Brandywine Floodplain, a National Register-listed bridge after rehabilitation.

The Department also worked on two metal truss bridges during the 2020 construction season. The Howellville Truss Bridge in Tredyffrin Township, Chester County was dismantled and moved to Tioga County in anticipation of adaptive reuse on a trail in District 3-0. (photo 3) The Main Street Bridge over SEPTA in Sellersville Borough, Bucks County, a riveted Pratt pony truss built in 1927 to eliminate an at-grade railroad crossing, was also rehabilitated in accordance with the Secretary of the Interior's Standards for Rehabilitation. The bridge is individually eligible for the National Register and contributes to the eligible Sellersville Historic District; the work retained the character-defining features representing its engineering significance and its ability to contribute to the district. (photo 4)

Photo 3: Howellville Truss Bridge in Tredyffrin Township as one truss is lifted off its stone abutments in preparation for the move to Tioga County.

Photo 4: Main Street Bridge over SEPTA in Sellersville Borough, post-rehabilitation. The bridge is individually eligible and contributes to the Sellersville Historic District.

Also in PennDOT's District 6-0, the Bryn Mawr Avenue Bridge over Meadowbrook Run in Radnor Township, Delaware County was rehabilitated in the summer of 2020. The structure is an individually listed 1905 concrete-encased steel beam bridge with unusual decorative arched brick facias and stone abutments. The scope of work included construction of a moment slab and concrete parapet cores, similar to the Lenape Road Bridge Project, with the distinctive parapet walls

reconstructed over the crash-worthy cores. (photo 5). Lastly, to the north in Greenwich Township, Berks County, District 5-0

Photo 5: Bryn Mawr Avenue Bridge over Meadowbrook Run in Radnor Township after parapets were reconstructed with a concrete core.

rehabilitated the Dreibelbis Station Covered Bridge. The National Register-eligible 1869 Burr Arch wooden truss bridge was lifted off its abutments with 150 spectators, including several members of the Dreibelbis family, watching. Contractors transported it to Lancaster Timber Framing's facility where it was rehabilitated before being set on new stone-lined abutments in its original location. (photo 6) Each of these projects were closely monitored by the cultural resources specialists, who met with contractors, reviewed test panels and design details with consulting parties, and ensured the plans were executed as approved during the Section 106 process.

Photo 6: Dreibelbis Station Covered Bridge, removed from its original abutments. One abutment is seen in the left center of the photo, with several of the onlookers to its right.

B. Awards

Three PennDOT projects involving National Register-eligible resources won preservation awards in 2020. In Pittsburgh, a project planned to fill in a pedestrian underpass featuring the eligible 1964 mosaics by Virgil Cantini. District 11-0 and FHWA conducted intensive public outreach and Section 106 consultation throughout the project, resulting in a plan to reinstall the mosaic at a new publicly accessible location. The efforts were recognized by Do_co,mo.mo_US, who awarded the [Advocacy Citation of Merit](#) award.

The Frankford Avenue Bridge over Pennypack Creek in northeastern Philadelphia is the country’s oldest stone arch bridge still in service on a major traffic route. Constructed in 1697, the three-span structure was modified to accompany changing traffic needs in 1893 and 1950 but retained its National Register integrity. The recent rehabilitation received accolades from the [Preservation Alliance of Greater Philadelphia](#), which presented the team with a preservation award, and from [APC](#), which gave the team their 2020 TQI Community Connection and Enhancement Award.

The Penn Street Bridge, a 1913 -span open spandrel concrete arch connecting West Reading and the City of Reading, also won two awards in 2020. [Preservation Pennsylvania](#) presented the project team with the Ralph Modjeski Award for Excellence in Transportation Design, Preservation and Archaeology. Later in 2020, [ACEC Pennsylvania](#) bestowed a Diamond Award for Transportation to the team.

IX. Recommendations

The Cultural Resources Unit has been seeking better ways to engage the public, as well as to solicit for, and receive input from, consulting parties. It is important to engage the public as early in project delivery as possible to potentially gain important information that might affect the National Register eligibility of properties, as well as to develop projects that impact historic properties as little as possible. The COVID-19 pandemic forced an increase in online and virtual meetings. The positive feedback and increased participation suggests that the Department should continue to utilize online/virtual means of engaging the public, and continue to explore social media as a way to engage the public. Certainly there is a time and place for in-person meetings, but the lesson of this past year has been that there is much to be gained from online and virtual engagement.

The Cultural Resources Unit has continued to seek ways to address a funding gap for preserving historic metal truss bridges. \$18 million was reserved on the 2021 State Transportation Improvement Plan (STIP) to begin a ten-year program to rehabilitate locally owned historic metal truss bridges not currently on the STIP. A planning committee met several times in 2020 to develop criteria, and priorities, for this program. Plans were laid in 2020 to hire a full-time historic bridge program manager to assist with this program, historic bridge marketing, the development of web-pages and a story-map related to historic bridges (for inclusion in the PennDOT Cultural Resources website) and other initiatives related to historic bridges.

Appendix A
Exempted Projects List

Cultural Resource Exemptions

District	County Name	State Route	Section	MPMS	Project Title	Description	Exemptions	Exemption Date	Exemption Maker	Funding Type
1	Crawford		L00	112754	West Mead Twmsp LFAR 2020	Allegheny and Leslie Streets (Local Federal Aid Routes) West Mead Township, Crawford County Resurfacing	A.1.a	3/24/2020	Autumn Kelley	Federal Highway-Funded
