Appendix A: Exempted Projects

Appendix B: Section 106 Project Effect Findings

I. Introduction

The Pennsylvania Department of Transportation (PennDOT) has been delegated certain responsibilities for ensuring compliance with Section 106 of the National Historic Preservation Act (Section 106) on federally funded highway projects. This delegation authority comes from a signed Programmatic Agreement [signed in 2010 and amended in 2017] between the Federal Highway Administration (FHWA), the Advisory Council on Historic Preservation (ACHP), the Pennsylvania State Historic Preservation Office (SHPO), and PennDOT. Stipulation X.D of the amended Programmatic Agreement (PA) requires PennDOT to prepare an annual report on activities carried out under the PA and provide it to the FHWA, SHPO and ACHP within 60 days of the new calendar year. The following document is PennDOT's good-faith effort to comply with this Stipulation.

This annual report pertains only to projects funded by FHWA within PennDOT's Highway Administration. It does not include information related to other state-funded projects (i.e., those projects solely intending to comply with the Pennsylvania State History Code), from other PennDOT Departments (e.g., Multimodal Transportation or Driver and Vehicles Services) nor does it include information for other transportation projects awarded to other Commonwealth agencies (e.g., DCNR receives transportation funding from FHWA, through PennDOT, for trail projects). This report also does not include projects requiring permits from any other federal agency (e.g., United States Army Corps of Engineers [USACE], National Park Service [NPS], or United States Forest Service [USFS]) where those agencies function as the lead federal agency for a Section 106 undertaking.

The period covered in this annual review is between January 1 and December 31, 2021 and provides summary statistics on: projects exempted from further Section 106 review; effect findings (i.e., no effects, no adverse effects, and adverse effects); information on SHPO objections to effects determinations; an update on PennDOT Cultural Resource Professionals (CRPs) and District Designees (DDs) staffing and training to maintain their delegation to review projects under the PA; and finally, a few notable success stories.

II. Summary of Projects Reviewed under the PA

The heart of this document comes from Section X.D of the amended PA, which states: "PennDOT will prepare an annual report on the activities carried out under this Amended PA. The report will include a list of projects and findings made by PennDOT. The report may also identify issues and make recommendations for improving the implementation of this Amended PA. PennDOT will submit the report to the signatories

of this Amended PA, within 60 days of the start of the calendar year. The report will serve as the basis for an annual review of this Amended PA.”

This section provides a statistical summary of projects reviewed by PennDOT District Designees (DDs)—District Designees are PennDOT environmental staff in the Engineering Districts wo have completed Section 106 training—and Cultural Resource Professionals (CRPs), describes SHPO disagreements with determinations of eligibility and effect made by PennDOT, and summarizes comments made by federally recognized Tribes/Nations and consulting parties on projects. The data in the tables below are derived from PennDOT’s online cultural resources public consultation website PATH (Pennsylvania Heritage and Transportation) which can be found at <https://path.penndot.gov/>.

a. Exemptions

Appendix C of the Amended PA contains a list of project activities that may be exempted from further Section 106 review provided that the activities meet certain conditions. The activities on the list, with the conditions imposed, should have no potential to effect historic properties. Appendix C of the Amended PA is divided into two sections, Level 1 activities and Level 2 activities. Level 1 activities may be exempted by either DDs or CRPs, while Level 2 activities can only be exempted by CRPs.

Between January 1, 2021 and December 31, 2021, PennDOT exempted 208 federally funded projects from further review; DDs exempting 63 projects while CRPs exempting 145. The table below summarizes the number of exemptions made by each District and by the DDs and CRPs. A more detailed spreadsheet including a list of exempted projects, the exemption type per Appendix C of the Amended PA, the person making the exemption, and the date the exemption was made, can be found in **Appendix A** of this report.

b. Non-Exempt Projects

In addition to the 208 exempted projects, PennDOT also made 173 effect determinations. This includes: 135 findings of “no effect” (78%), 20 findings of “no adverse effect” (12%), and 17 findings of “adverse effects” (10%). These numbers are similar to the past several years of project undertakings and effect findings. The below table categorizes the effect findings by PennDOT Engineering Districts. A full listing of project findings can be found in **Appendix B**.

EXEMPTED PROJECTS

District	Designee	CRP	TOTAL
1	9	6	15
2	1	14	15
3	0	20	20
4	2	34	36
5	19	20	39

11	8	1	1	10
12	9	2	4	15
TOTAL	135	20	17	173

III. Disagreements/Objections and Concerns Expressed by the SHPO on Eligibility and Effects

A large component of PennDOT’s project delivery program and consultation under Section 106 relies on the inherent trust placed on it, and built over many years, by the SHPO and FHWA to submit projects without review and/or concurrence. As spelled out in the delegation programmatic agreement, PennDOT is only required to consult with the SHPO on findings of “no adverse effect,” under certain conditions as outlined in the

Amended PA, and all “adverse effect” findings. PennDOT’s CRPs may also consult with SHPO and seek concurrence outside of these scenarios at their discretion. Typically, this may include concurrence on level of identification, mitigation, and other consultation as part of the Section 106 undertaking. In total, PennDOT CRPs requested concurrence from SHPO 87 times (28 for eligibility and 82 for effects determinations). Of those requests, seven resulted in a disagreement or objection from SHPO. All of these objections were resolved through further consultation or are on-going as of the drafting of this report. The below table enumerates the total number of eligibility and effects concurrence requests by Engineering District:

SHPO Concurrence Requests

District	Eligibility	Effects	TOTAL
1	0	0	0
2	0	0	0
3	1	0	1
4	3	4	7
5	3	7	10
6	12	13	25
8	5	5	10
9	2	1	3
10	0	0	0
11	0	0	0
12	6	5	11
TOTAL	32	35	67

SHPO Objections on Eligibility and Effects:

- District 6-0, Chester Co., SR 0030-082, MPMS# 107554, SHPO Review# 2021PR01895: SHPO disagreed with PennDOT’s boundary justification for the Raymond Pace Alexander and Sadie Alexander Property (2020RE01611). PennDOT provided justification for why the 11.5-acre boundary should not represent the tax parcel boundary. SHPO continues to disagree with PennDOT’s determination stating that “sufficient new information has not been provided to illustrate that the property has changed to such a degree since 1966 to exclude the surrounding landscape from the boundary”. PennDOT has not resolved this disagreement.
- District 6-0, Chester Co., SR 0041-STA, MPMS# 110311, SHPO Review# 2021PR01402: PennDOT submitted a revised boundary for the Avondale Historic District (2001RE01456) and provided additional justification for the

revised boundary. However, SHPO continues to disagree on the alteration. Specifically, SHPO stated: “While the properties at the corner of S.R. 0041 (Pennsylvania Avenue) and State/1st Street intersection have suffered some loss of integrity due to demolition and construction, overall, the visual continuity is retained through the size and scale of the intrusions and the historic buildings that do remain. In addition, several properties appeared to have been demolished prior to 1937. Therefore, in our opinion, the boundary at the south and east of Avondale Historic District should continue to extend to White Clay Creek...” SHPO’s objection to the boundary alteration has not been resolved.

- District 9-0, Somerset Co., SR 0403-015, MPMS# 113442, SHPO Review# 2021PR01569: SHPO disagreed with PennDOT’s determination that the Jonathan T. Eash Property (2021RE01338) is eligible for listing in the National Register. PennDOT has accepted SHPO’s opinion that the property is not NR eligible.
- District 12-0, Westmoreland Co., SR 0981-Y10, MPMS# 108140, SHPO Review# 202PR03083: SHPO disagreed with PennDOT’s boundary justification for the NR boundary for the Poorman Farm (1995RE22987). PennDOT argued that the NR boundary is the footprint of the house, while SHPO commented that the NR boundary is the entire parcel. PennDOT agreed with SHPO’s boundary proposal.

IV. Consultation

PA SHPO had a successful launch of their new file management system called PA-SHARE (Pennsylvania Historic and Archaeological Resource Exchange) in early 2021. This new system replaced, and enhanced, the old CRGIS that PennDOT helped fund and hosted on our servers. PA-SHARE also replaced SHPO’s environmental review tracking system. In effort to reduce redundancy of data entry, duplication of efforts, and human data-error entry, PennDOT and SHPO successfully integrated PATH with PA-SHARE. Public consultation documents stored in PATH can be automatically exported to PA-SHARE. SHPO comments made on project submissions in PA-SHARE are exported to PATH. PA-SHARE also provides PATH projects with a project review number automatically. PATH also has the capability to export basic shapefile data to PA-SHARE for initial project submissions. Going forward, SHPO and PennDOT have already identified future enhancements including better integrating and capturing mitigation data from PATH into PA-SHARE.

V. Training and Delegation under the PA

a. Training Updates

PennDOT, FHWA, and SHPO held a one-day joint meeting in the fall of 2021 at Memorial Lake State Park and concluded with a tour of the recently rehabbed Ironwood Bridge which now sits in a county park approximately a half-mile south of its original location. The meeting met the requirements of Appendix B of the Amended PA for annual CRP refresher training and was accepted by the signatories of the Amended PA. PennDOT kept this meeting to agency personnel only; therefore, delegated CRP consultants, who were seeking to retain their delegation were offered two online webinars to fulfill the refresher training requirements.

PennDOT also offered refresher training to District Designees operating under the Amended PA via a presentation at the Environmental Managers Meeting, which was held virtually in May 2021. There was no training for environmental staff seeking to be delegated as District Designees in 2021; training, however, is anticipated to be offered in 2022.

b. PennDOT Staff Updates

During 2021, one of PennDOT's CRPs transferred to another state agency. This temporary vacancy was filled by a PennDOT-delegated consultant archaeologist until a temporary replacement was found. PennDOT filled this vacancy with the hiring of T. Arron Kotlensky. Arron will cover the archaeology duties for Districts 11-0 and 1-0. This will allow Susanne Haney to still cover District 10-0 while also taking over the operations of the PHAST (Pennsylvania Highway Archaeological Survey Team) program. PennDOT also created a new position in the Cultural Resources Section and hired Veronica Martin, who recently completed her Master's degree in Historic Preservation from the University of Maryland in 2020. Veronica will lead PennDOT's historic bridge marketing and the Historic Metal Truss Bridge Capital Rehabilitation Program.

The PennDOT Cultural Resources program is now comprised of one Section chief (Kara Russell), two supervisors (Kris Thompson, for architectural historians, and Kevin Mock, for archaeology), 12 District CRPs, and the new position of historic bridge marketing.

c. Consultant Support

PennDOT relies on consultant cultural resource professionals to in-fill and supplement existing District CRP complements where needed. All consultant CRPs

meet the same rigorous standards as permanent staff, including meeting Secretary of the Interior standards and qualifications, as well as PennDOT's delegation process and Section 106 training. In November and December 2020, PennDOT completed a series of consultant CRP refresher trainings.

PennDOT currently has a pool of 16 consultant CRPs (nine architectural historians and seven archaeologists).

VI. Success Stories

- District 1-0, Messerall Bowstring Truss Bridge: Originally constructed in 1876 to carry Messerall Road over Pine Creek in Oil city, PennDOT partnered with the Department of Conservation and Natural Resources (DNCR) to relocate the bridge to Pymatuning State Park where it will be used on a trail expansion project. Prior to it being moved to Pymatuning, the bridge was lifted from its current foundations and will be sent to a workshop where it will be rehabilitated and reassembled.

Messerall Bridge being lift from its original foundations.

- District 6-0, Trinity Lane Bridge: The Trinity Lane Bridge crosses Gulph Mills Creek in Upper Merion Township, Montgomery County with a single span, closed spandrel, stone masonry arch bridge built in 1789 and widened in 1884. The bridge is located in a suburban area of Montgomery County and carries about

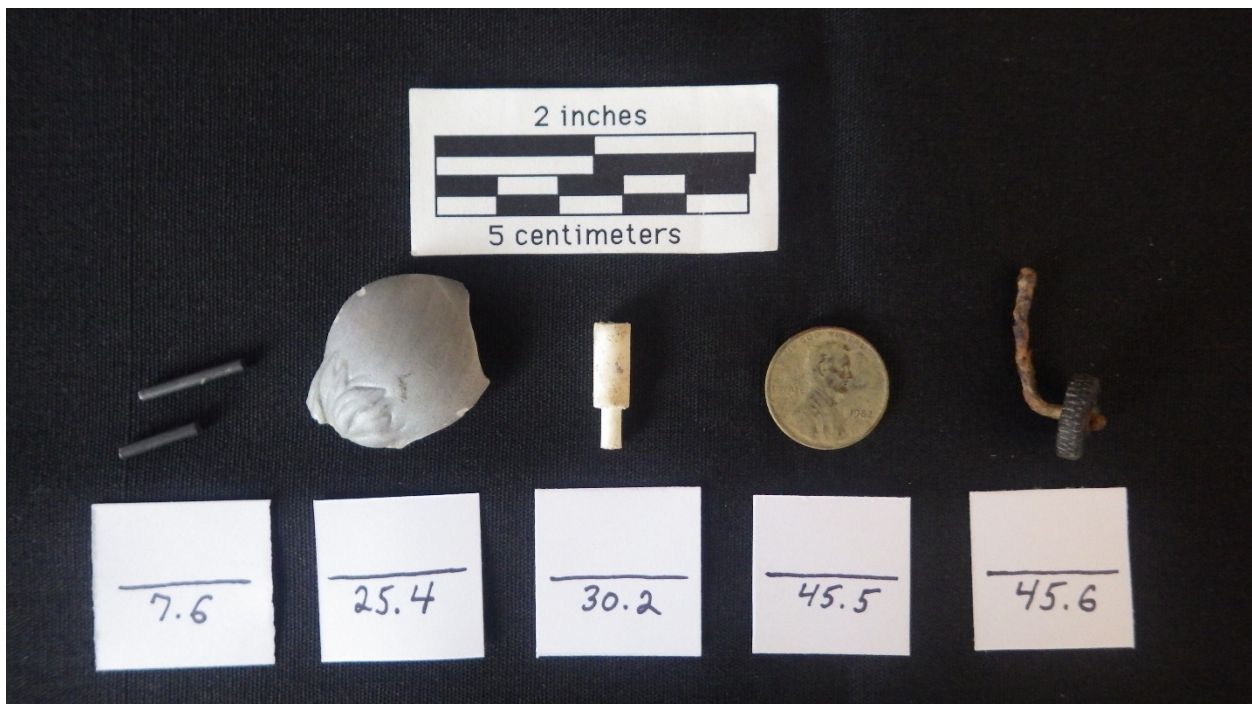

5,000 vehicles per day. This historically significant bridge is the fifth oldest highway bridge in the United States and third oldest bridge in Pennsylvania. The rehabilitation program scope of work included removal of the bituminous pavement, earth fill, and stone parapets. Deteriorated portions of the arch barrel, spandrel walls, and wingwalls were dismantled and rebuilt. The concrete portion of the arch barrel and ringstones on the upstream side was replaced with stone. A lightweight concrete fill was placed between the spandrel walls, and a full width concrete slab with integral concrete barriers was constructed and faced with stone salvaged from the bridge parapets and new supplemental stone. A bituminous wearing surface was placed on the concrete moment slab. The masonry spandrel walls and wingwalls were repointed. The bridge plaques were salvaged, cleaned, and reset in the rehabilitated bridge parapet. Brown painted guiderail was installed at two corners.

Trinity Lane Bridge after rehabilitation.

- District 2-0, Centre Co., SR 26: PennDOT completed an archaeological investigation of the Henderson Schoolhouse property (36CE0585) for a roadway betterment project. The cultural remains identified from the investigations were

investigated within the context of Burrowes' 1855 common school manual best practices and through the application of the Beisaw and Gibb Site Formation Model developed for schoolhouse properties—669 historic period artifacts, including a few toys and personal artifacts belonging to the children who attended the school, and eleven cultural features were identified at the site. The application of the Site Formation Model and use of the 1855 best practices manual were new approaches to schoolhouse archaeology studies in Pennsylvania. Using this methodology, PennDOT, in consultation with the SHPO, determined that the Henderson School site did not meet the criteria for eligibility for listing in the National Register of Historic Places.

Artifacts from the Henderson Site.

VII. Recommendations

The Cultural Resources Section continued to operate, in 2021, with restrictions imposed by the COVID-19 pandemic. While the program appears to have had an approximate 10 percent decline in numbers of projects delivered from years' prior, engaging the public and consulting parties online became more common and generally resulted in greater participation, and, in some cases, better outcomes. The Cultural Resources Section will continue to seek to better engage the public and consulting

parties through online means and will continue to explore new opportunities to raise awareness of consultation opportunities.

Additionally, a goal of the Cultural Resources Section is to seek better outcomes for the protection of cultural resources by encouraging engagement earlier in the project development process. Doing this will require the Cultural Resources Section to get more involved in project planning. PennDOT hired a historic bridge program manager in 2021 who has already begun working closely with the PennDOT Program Center, MPOs/RPOs, as well as county and municipal governments regarding our historic bridge adaptive use program. This is a small step towards broader involvement in transportation planning as we seek to identify adaptive uses for historic metal truss bridges in advance of bridges being programmed on the Transportation Improvement Program and in conjunction with the Historic Metal Truss Bridge Capital Rehabilitation Program. A focus for 2022 is to begin greater efforts to plan for the proactive maintenance of historic concrete bridges, particularly ones of high or exceptional preservation priority.

Another area of improvement that PennDOT and SHPO have been in discussion is in mitigation tracking. Currently, PennDOT uses PATH to capture mitigation data for cultural resources activities and ECMS (Engineering and Construction Management System) which uses ECMTS (Environmental Commitments and Mitigation Tracking System) to ensure mitigation is completed in final design and construction, while SHPO also tracks mitigation through their PA-SHARE system. To reduce redundancy and possibly to provide for standardization, PennDOT and SHPO will be working to identify how to best integrate these three systems.

Appendix A
Exempted Projects List

District	County Name	State Route	Section	MPMS	Project Title	Description	Exemptions	Exemption Date	Exemption Maker	Funding Type
1	Crawford		F02	115761	City of Meadville - LFAR 2021-2022	Jefferson Street City of Meadville, Crawford County Highway Resurfacing, LFAR	A.1.a	12/15/2021	Autumn Kelley	Federal Highway-Funded
1	Crawford		R01	111140	Mead Ave RR Crossing	Upgrading of pavement, signs, and lights at the signal crossing.
