

Utility Relocation Management System Newsletter

Volume 3: 11/3/2020

PennDOT's Utility Relocation Management System

Launching November 22, 2020

PennDOT's new Utility Relocation Management System (URMS) will launch on November 22, 2020. In Volume 3 of this newsletter, we highlight some of the ways that URMS enables PennDOT and Utilities to share mutually beneficial information.

URMS Enables Greater Information Sharing

PennDOT operates many computer management systems that collect data and guide business processes. URMS brings together relevant data from many of those systems and presents it in a way to assist the utility coordination and relocation process.

Link to One Map with a Customized Display

In recent years, PennDOT has launched, and continually improved, its One Map system. One Map provides a map-based system to view PennDOT projects overlaid with a wide assortment of other location-based data. The URMS One Map links goes directly to a zoomed in view of the project, with a custom set of map information layers.

In addition, PennDOT data can be downloaded from One Map to allow users to feed the information into their own GIS systems for analysis.

Relevant Bridges and Roadways

Bridge Occupancy License Information

Utility facilities that are attached to a bridge are required to have a Bridge Occupancy License. URMS retrieves information about any existing Bridge Occupancy Licenses for bridges within the project limits.

Utility Relocation Management System Newsletter

Highway Occupancy Permit Information

Highway Occupancy Permits are issued for any utility facility within the state-owned right-of-way. HOPs may be issued as part of a PennDOT bridge or highway project or as standalone work performed by the utility. URMS retrieves historical HOP records (open and closed) and displays it as part of the project location information.

Highway Occupancy Permits (HOP) Information

Applicant name	County	SR	Begin Segment	Begin Offset
MUNIC. AUTH. BORO OF WEST VIEW	Allegheny	0051	0540	0540
MUNIC. AUTH. BORO OF WEST VIEW	Allegheny	0051	0540	0540

Environmental Documents

The main Project Information page in URMS has a direct link to the environmental documents that were prepared for the bridge or highway project. These documents become important when permits are required for utility facilities located in areas controlled by state or federal environmental regulations.

MPMS & Environmental Information

Project Improvement Description: Bridge replacement with a precast box culvert and other miscellaneous construction.

Project Location Description: Existing structure carrying PA 8 over the south branch of Glade Run in Middlesex Township.

Federal Project Status: Exempt Off NHS
