

Route 11/15 Rock Slope Safety Project

Reaching Out To Motorists and Communities

- Media releases and website updates will be provided to convey project milestone dates and project updates
- Portable changeable message boards will be used in conjunction with all regional District permanent overhead variable message boards to convey project milestone dates and alert motorists of incidents or closures along Route 22/322
- Traffic alert radios will be used to warn truck drivers of restricted routes
- Project stakeholders including Motor Truck Association (MTA) and American Automobile Association (AAA) will be notified at least two weeks prior to implementing the Route 11/15 Closure
- Use the 511PA system to receive traffic information on Route 22/322 during the Route 11/15 closure
- Follow any of the 511PA regional Twitter pages which include news releases and traffic advisories, along with all traffic and construction events
