

Penn Valley Airport (SEG) is a general aviation airport located directly north of Selinsgrove in central Pennsylvania. The airport supports a wide variety of general aviation activity, including recreational flights, corporate/business flights, air charter, police/law enforcement, and emergency medical transportation. A large majority of the airport's general aviation activity consists of career flight training exercises and aerial inspection on power lines. The airport is supported by a fixed-base operator, Energy Aviation. An air ambulance service, Geisinger Health Systems, is also based at the airport and provides a crucial link to the emergency medical network for the region. Companies and organizations rely on the airport to fly in corporate personnel and products. From supporting emergency medical transportation, to being the training-ground for the next generation of aviators, the airport plays a pivotal role in the local community.

*This airport is classified as a Advanced Airport in Pennsylvania's State Aviation System Plan and is eligible to receive federal funding from the FAA.*
